

1. INTRODUCTION and APPLICATION of the PRODUCT

Royax high quality and performance respirators work using electrostatic properties to attract and then to trap the tiniest of existing particles.

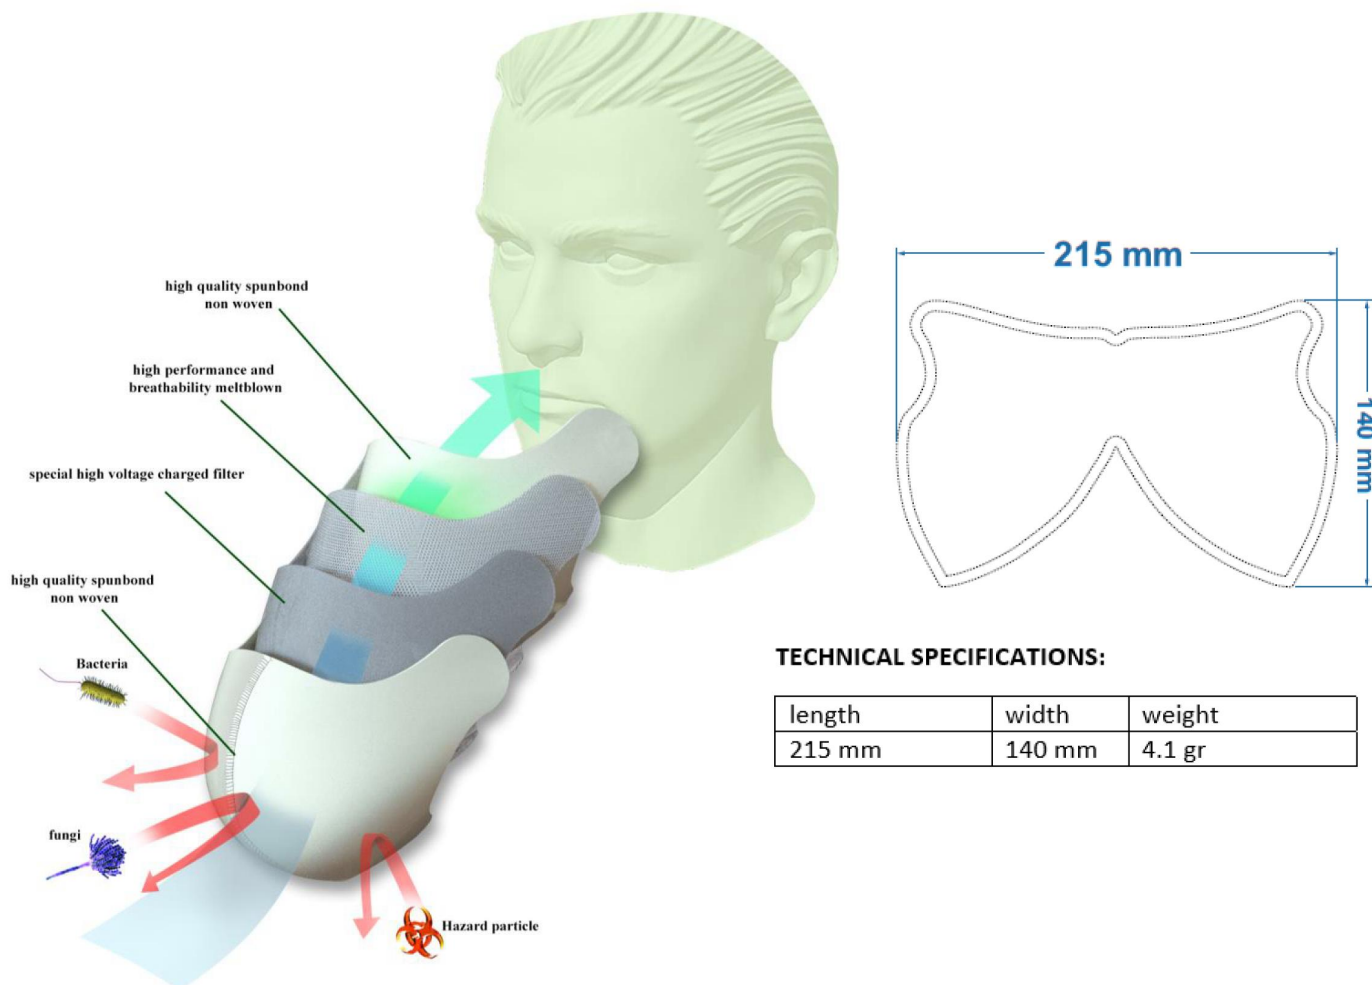

Our respirator is designed to protect against living organisms such as bacteria, fungi and also fine dust, fibers, aqueous mists, oil-based mists.

Microorganisms (bacteria, fungi) can be transmitted by various routes. Respiratory protection is needed to prevent infection with organisms which usually enter the body through inhalation (droplet/airborne).

Also, respiratory protection is crucial to reduce risk of airborne infections spreading when the people cough, sneeze or speak.

Our respirator product is closely face-fitting in order to make a seal. Additionally an adjustable nose clip is incorporated to prevent leakage and provide comfort.

2. COMPONENT PARTS of the PRODUCT

3. TRANSPORTATION

ROYAX has established his worldwide network of logistics partners who ensure safe and on-time deliveries with reasonable prices, as well as including several in-demand services like customs clearance and etc.
